

# ГОТОВИМСЯ К ЕГЭ И ОГЭ ПО АНГЛИЙСКОМУ ЯЗЫКУ

## THE NEW WORLD OF WORK

Nowadays, labour markets around the world are going through significant transformations, and the pandemic has accelerated the changes. Let us consider some of those changes that are shaping the new world of work.

### Remote work.

Globally, we may observe that the demand for remote work continues to skyrocket. Remote work or distance working can be efficient and useful for companies since it allows workers to communicate over long distances, saving significant amounts of travel time and cost. It is facilitated by such technologies as common software, Internet access, mobile telecommunications, etc.

### New skills

In the future employees will need to acquire new skills. With the technological progress, millions of jobs may be displaced by a shift in the division of labour between humans and machines, so people will have to learn more to get new skills. Self-management, active learning, critical thinking, flexibility will gain prominence.

### New industries

People will work in new industries. Among the fastest growing industries are: artificial intelligence, which is said to have an great impact on every sphere of work over the next several years, nanotechnologies, which are going to revolutionize the world, robotics, data science and other. So, there will be growth in engineering jobs.

## Ecology

We will have to take into consideration the ecological problems, some jobs in the spheres that pollute our planet or harm it will disappear or be transformed. More and more industries are recognizing the necessity to protect the environment. We will need more professionals working on environmental issues.
